anti- Endoglin/CD105 antibody

Product Information
Catalog No.: F Nab10035
Size: 100µg
Form: liquid
Purification: Immunogen affinity purified
Purity: ≥95% as determined by SDS-PAGE
Host: Rabbit
IsoType: IgG
Storage: PBS with 0.02% sodium azide and 50% glycerol pH 7.3, -20°C for 24 months (Avoid repeated freeze / thaw cycles.)

Background
This gene encodes a homodimeric transmembrane protein which is a major glycoprotein of the vascular endothelium. This protein is a component of the transforming growth factor beta receptor complex and it binds to the beta1 and beta3 peptides with high affinity. Mutations in this gene cause hereditary hemorrhagic telangiectasia, also known as Osler-Rendu-Weber syndrome 1, an autosomal dominant multisystemic vascular dysplasia. This gene may also be involved in preeclampsia and several types of cancer. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Immunogen information
Immunogen: endoglin
Synonyms: CD105, END, Endoglin, ENG, FLJ41744, HHT1, ORW, ORW1
Calculated MW: 50 kDa, 67 kDa
Uniprot ID: P17813

Application
Specificity: Human; other species are not tested. Please decide the specificity by homology
Tested Application: ELISA, WB
Recommended dilution: WB: 1:200-1:2000
Image:
MCF-7 cells were subjected to SDS PAGE followed by western blot with FNab10035(ENG antibody) at dilution of 1:1000.
